

## **Micro Planning on Hot Spots to mitigate air pollution**

Following Hotspots identified on the basis of construction activity so far:

1. Manicktala Main Road
2. Canal South Road
3. J.B.S. Halden Avenue
4. Christopher Road
5. Diamond Harbour Road
6. Anandapur
7. Bara Khola
8. Mukundapur
9. B.L. Saha Road
10. Mon Mohan Banerjee Road

Above selected hotspots are mostly large construction sites. AQMS to be installed at sites to monitor air quality. During sanction of building plan, an undertaking has been submitted by the builders / developers that they will follow environment norms during construction. The building dept of KMC will ensure that environment norms are complied by the builders / developers during construction work.. Extensive water sprinkling arrangement is made by SWM dept around Hot Spot areas to control dust particle. Kolkata Police will ensure free traffic movement by restricting on road parking and removing encroachments. Stacking of building materials on road side is also regulated by Kolkata Police. Public awareness campaigning are done to sensitize public on the factors causing air pollution.
